OCCUPANTS CHEMICAL NOTICE

Golden State Structural Pest proposes to use the pesticide products listed below to control wood-destroying pests in the locations identified by the structural pest control report referenced above.

(1) Pests to be controlled

- ☑ Subterranean termites
- ☑ Wood-boring beetles

(2) Pesticides proposed for use and active ingredients

- ☑ A. **Termidor HE**
  Active ingredients: Fipronil 8.73%
- ☑ B. **Tim-bor Professional**
  Active ingredients: Disodium octaborate tetrahydrate 98%

(3) Required pesticide information

State law requires that you be given the following information: CAUTION - PESTICIDES ARE TOXIC CHEMICALS. Structural Pest Control Companies are registered and regulated by the Structural Pest Control Board, and apply pesticides which are registered and approved for use by the California Department of Pesticide Regulation and the United States Environmental Protection Agency. Registration is granted when the state finds that, based on existing scientific evidence, there are no appreciable risks if proper use conditions are followed or that the risks are outweighed by the benefits. The degree of risk depends upon the degree of exposure, so exposure should be minimized.

If within 24 hours following application you experience symptoms similar to common seasonal illness comparable to the flu, contact your physician or poison control center and your pest control company immediately.
