LAC 7:XXV.141.E.4 All pre-treatment of slabs or pier type construction shall be submitted by online form or called in to the department's district office in which the pretreat occurs, a minimum of one hour prior to beginning the application of termiticides. The information provided shall include treatment company name; treatment structure street address, city, zip code, parish; if available; and/or directions to the property being pre-treated; date and time of beginning the application of termiticides to the property; estimated square or linear footage of each structure to be treated; and number of reported structures. All pest control operators shall keep a log of all pretreats including the information noted.

LAC 7:XXV.117.Q The pest control operator shall record the nature and date of the completion of new construction, as found in §101.B within the definition of construction, and maintain the date as part of the application records.
