		☐				
		☐				

Termiticide volume details, where applicable	Notes

Rule 111.01: Persons licensed or permitted under this chapter shall keep complete and accurate records of all work performed for a period of two (2) years from completion of the work. Persons performing services in the category of wood destroying insect control (WDIL) must keep complete and accurate records of all work performed, including treatment records, inspection reports, and copies of all contracts issued, for as long as any contract is current and for two (2) years after expiration of the latest contract. Such records shall be available for examination by employees of the Bureau during reasonable business hours. Such records shall include location, kind of services performed, date performed, the pest controlled, brand name and EPA registration number of pesticide used, total amount of product used, the pesticide dilution rate, the total volume of diluted pesticide applied, and where applicable, sufficient information to determine termiticide volume and such other information as may be necessary for a complete record. Additionally, when making an application involving a restricted use pesticide, the operator must record all information required by the Mississippi Pesticide Application Law, Subchapter 02, §206.

Ch. 09 Rule 206: Such records shall include: 1. Name and address of the person for whom the RUP is applied 2. Location of the RUP application 3. Size of the area treated 4. Crop, commodity, stored product, or site of application 5. Time and date of application 6. Brand or product name of pesticide applied 7. EPA registration number 8. Total amount of RUP per location per application 9. Name and certification number of the certified applicator
