PRE-CONSTRUCTION TERMITE TREATMENT RECORD

Street address	City	State / ZIP	Date of treatment	Pages
				1

PCO no.
Record no.
Permit no.
TMK

Client (builder or general contractor)	Client's address	Contractor license no.

Applied by

Applicator	License no.	Branch	RME in charge	RME license no.

Termite protection method ☐ Soil chemical treatment ☐ Stainless steel termite barrier ☐ Other approved measure

Product	EPA Reg. No.	Active ingredient (%)	Finished dilution (%)

Applied at the maximum label rates? ☐ Yes ☐ No — **Label maximum**

Area treated

Treated zone	Rate applied	Area or length	Finished dilution (gal)
Horizontal, under the slab			
Vertical, interior foundation			
Slab penetrations			
Vertical, exterior perimeter			
		Total finished dilution	

Barrier or approved measure, construction stage, and notes

Signature of applicator		Date
Received for the builder	**Printed name**	**Date**

Hawaii State Building Code, IBC 2304.12.2.1 (2018 IBC as amended): "Where structural lumber of wood frame buildings or structures are supported directly on the ground by a concrete slab, or concrete and/or masonry foundation, Formosan subterranean termite protection shall be provided by either chemically treating the soil beneath and adjacent to the building or structure by a Hawaii licensed pest control operator, or stainless steel termite barrier, or other termite protection measures approved by the building official. All soil treatment, stainless steel termite barrier, and termite protection measures shall be installed according to manufacturer's recommendations for control of Formosan subterranean termites, with chemical barriers applied at the maximum label rates."

HRS 460J-24: "A licensed contractor may contract for the performance of any soil treatment pest control work to eliminate, exterminate, control, or prevent infestations or infections of pests from the ground beneath or adjacent to any existing building or structure or in or upon any site upon which any building or structure is to be constructed, but the actual performance of any such work shall be done by a licensed pest control operator."

HAR 16-94-25.5: "A pest control operator or RME shall keep records on all jobs performed for a period of at least two years. Each record shall include, but not be limited to, the following information: (1) Date of job; (2) Client's name and address; (3) Branch of pest control; and (4) Chemicals and treatment method(s) used."
