Certified applicator	Certification No.	
Marisol Vega	24917	

Notes and recommendations

German cockroaches were found under the kitchen sink and behind the range in Unit B. Please leave the bait spots in place and keep the area behind the range clean, since grease there feeds roaches. Pavement ants were trailing along the east wall and the Unit A front step, so we treated the foundation of both units. Keep people and pets off the outside foundation until the spray has dried. We will check the bait in two weeks.
